Created By Quatral.

Thank you for downloading my comic, it was a lot of fun to make and I appreciate the interest!

This comic was made in ArtStudio (then later in Procreate) and was published between July and August of 2018, being uploaded on Smackjeeves and my Twitter twice a week. To those who followed each update closely, and gave me so much great feedback, thank you <3

Any idea where we landed?

It looks like.... maybe a field?

Maybe a field? It's definitely a field.

That sounds accurate.

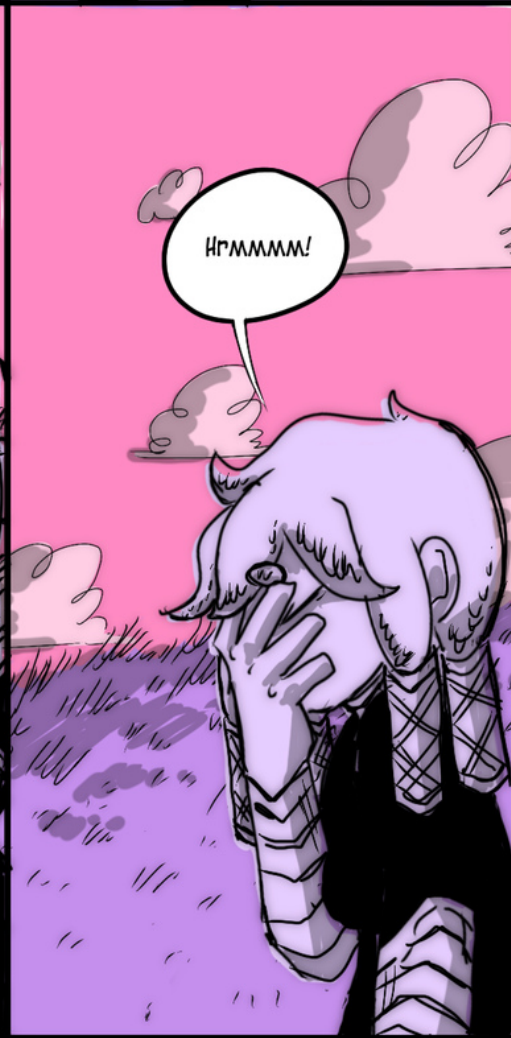

Are you trying to annoy me?

Are you stressed? You seem stressed.

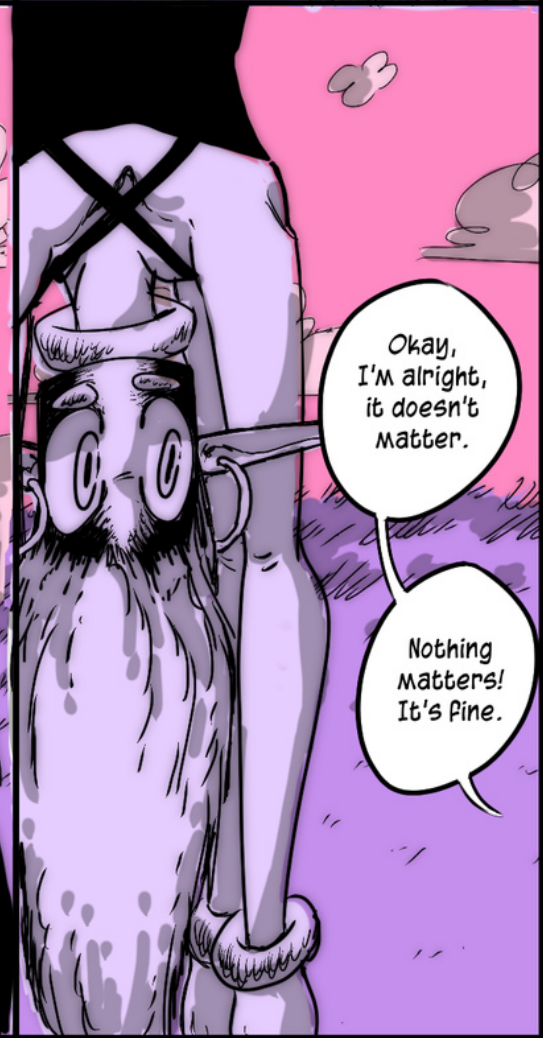

Well duh I'm stressed!! I think my whole family just died!!

That would definitely be a valid reason to be stressed.

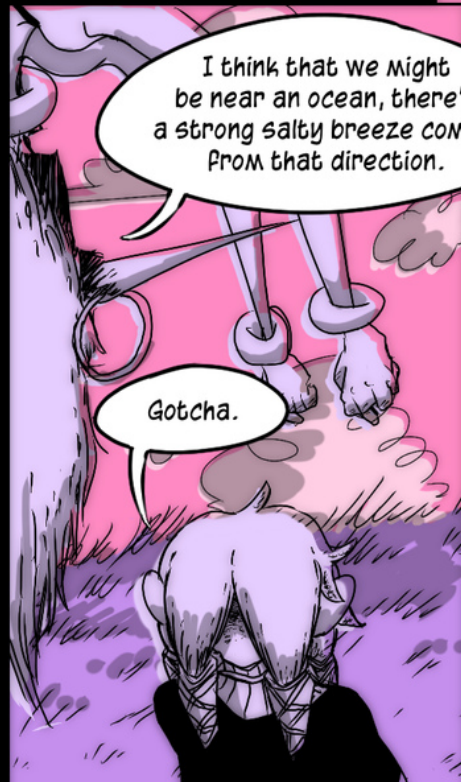

Hrmmmm!

Okay, I'm alright, it doesn't matter.

Nothing matters! It's fine.

I think that we might be near an ocean, there's a strong salty breeze coming from that direction.

Gotcha.

So what are you?
A demon?

Well, I'm a reflection of you. A reflection off of the grey pool.

That almost makes sense...

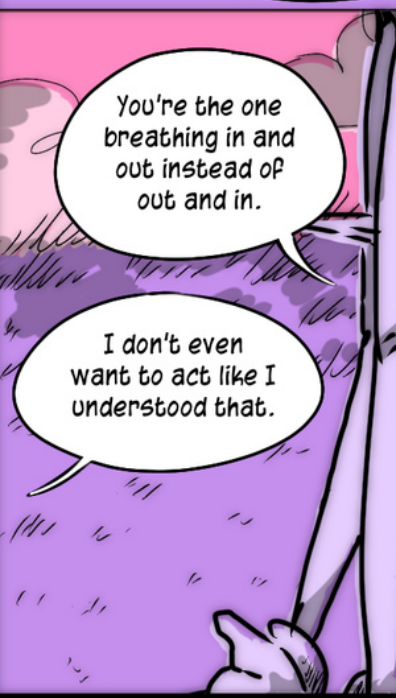

Is that why you look all, like, reversed?

I'm not reversed, you are.
You're the one standing up.

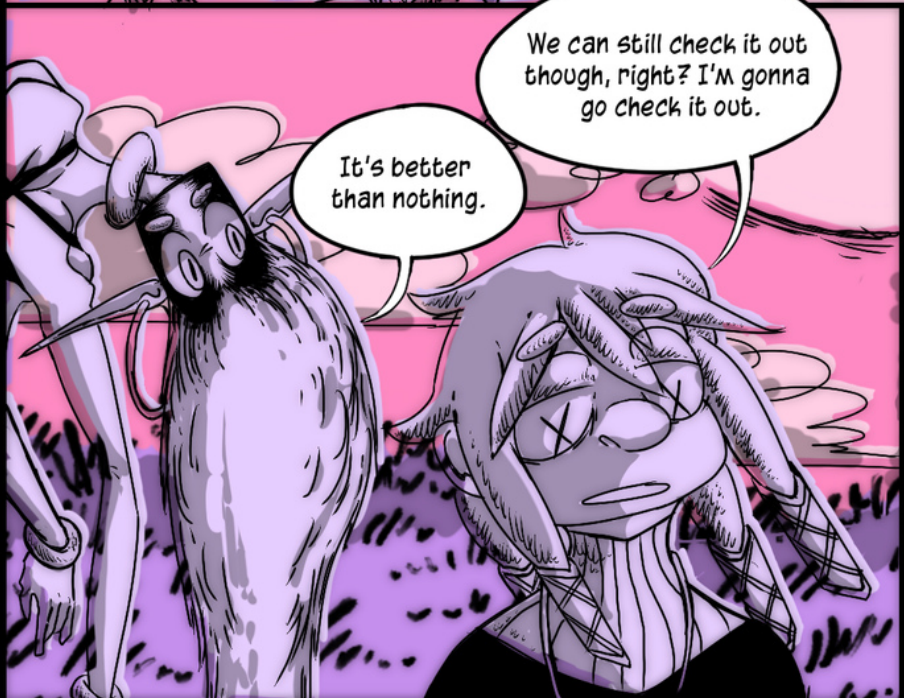

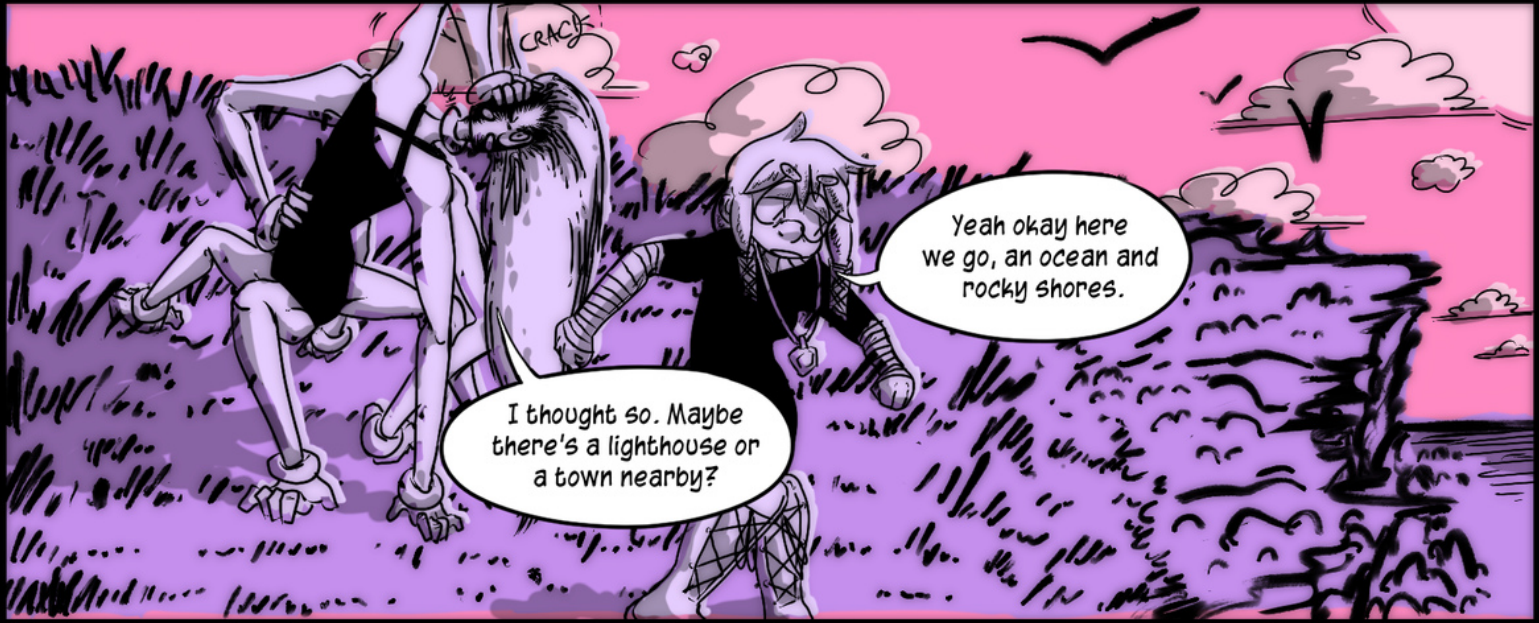

Huh?

You're the one breathing in and out instead of out and in.

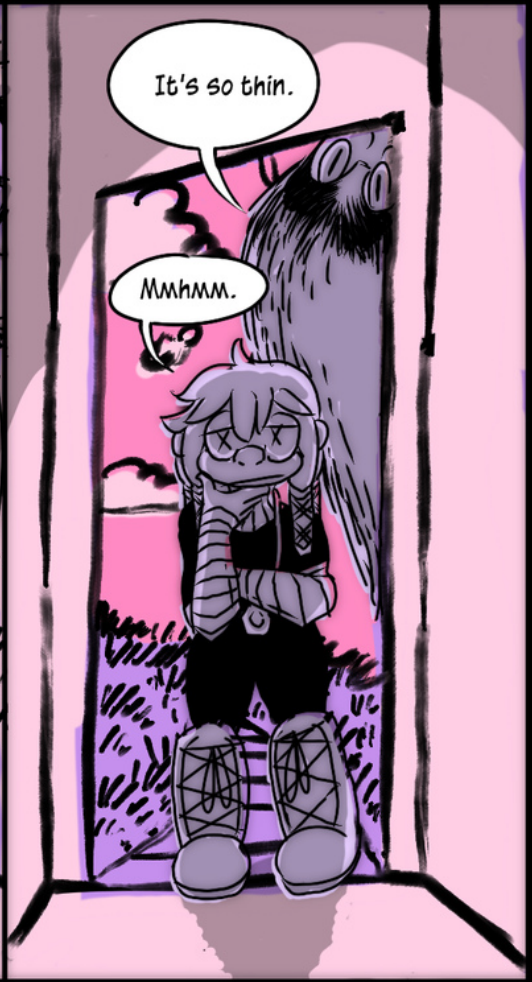

I don't even want to act like I understood that.

Man I'm really getting like, alienated and shit this is so weird.

Someone forgot to mow the grass out here.

It's so thin.

Mhmm.

D'ythink it's some kind of house?

Hmm.

I've never seen a tree like this before.

If it is a house, then someone probably lives here.

Yeah... let's tread lightly...

We don't need to move it, we can just move B's simulator to G.

No, we need to move the X simulator or else we won't be around to move ANYTHING.

You didn't used to be this combative.

"I" didn't used to be anything! YOU'RE the one that's suddenly become so-

Alright, hey-

We're ALL at risk if we don't move the X sim, that has to happen as soon as possible.

I agree it does need to happen, but what about the creatures in Uni B? We can't just let them-

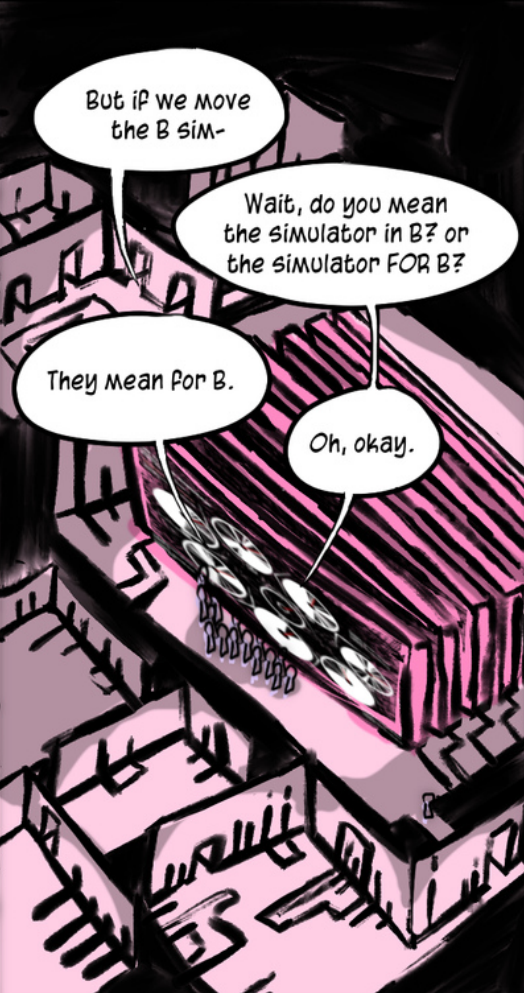

Uni B isn't in danger if we move the B simulator FIRST!

Oh my GOD! You're not even listening to me!

I don't need to listen to anyone that doesn't care about the well being of their own collective.

I DO care!

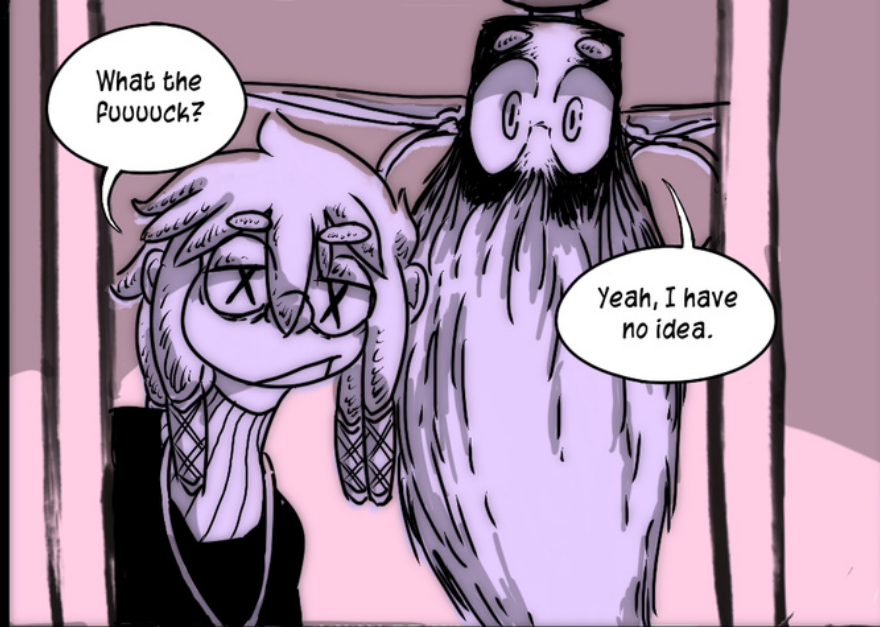

But if we move the B sim-

Wait, do you mean the simulator in B? or the simulator FOR B?

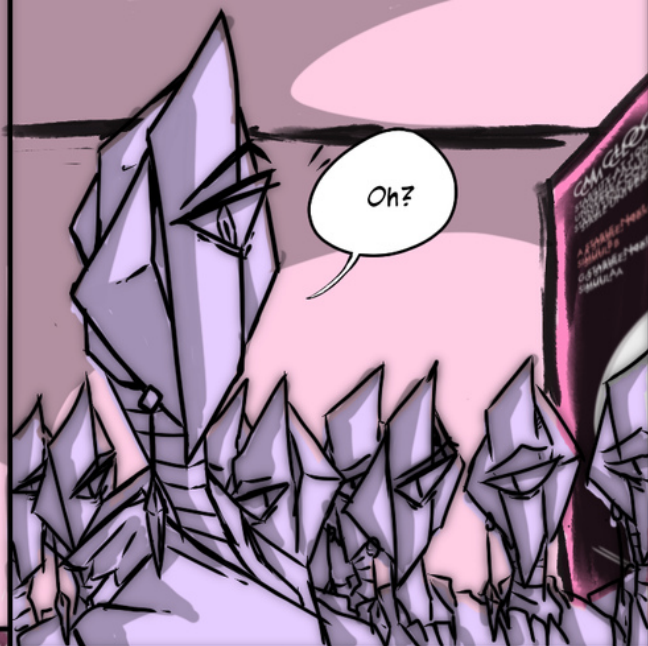

They mean FOR B.

Oh, okay.

What the fuuuuck?

Yeah, I have no idea.

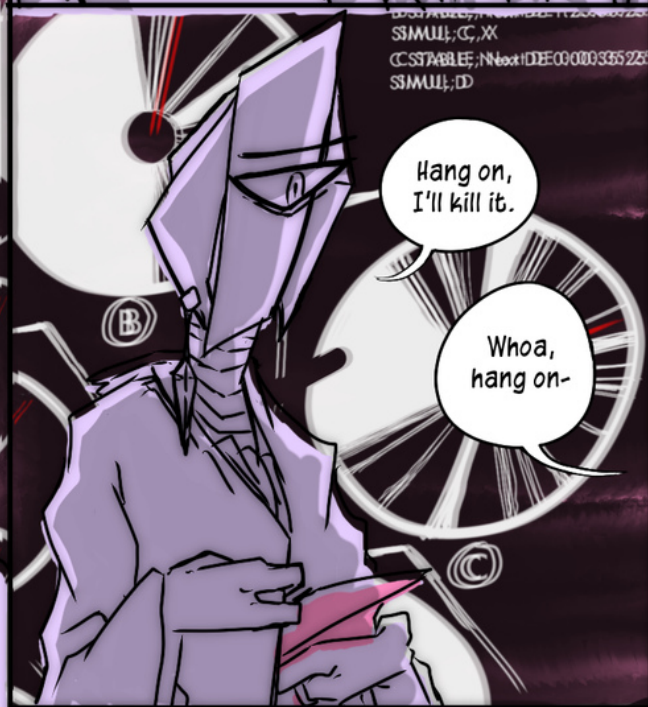

Oh?

It's one of those things, in the doorway there.

Who let it in here? Has it been listening to us?

Hang on, I'll kill it.

Whoa, hang on-

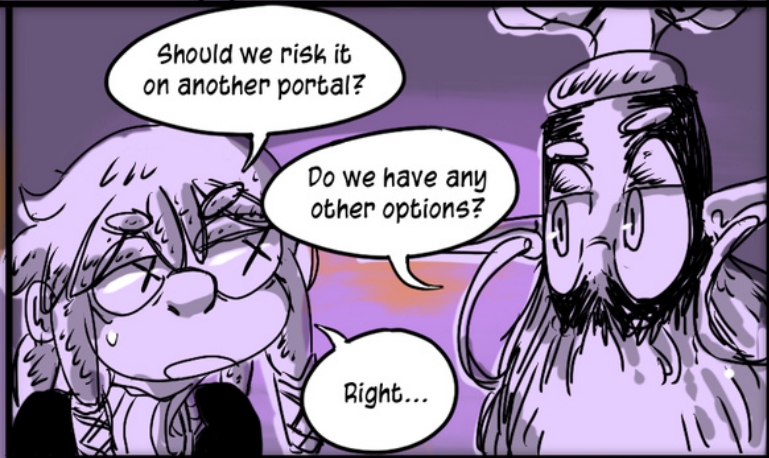

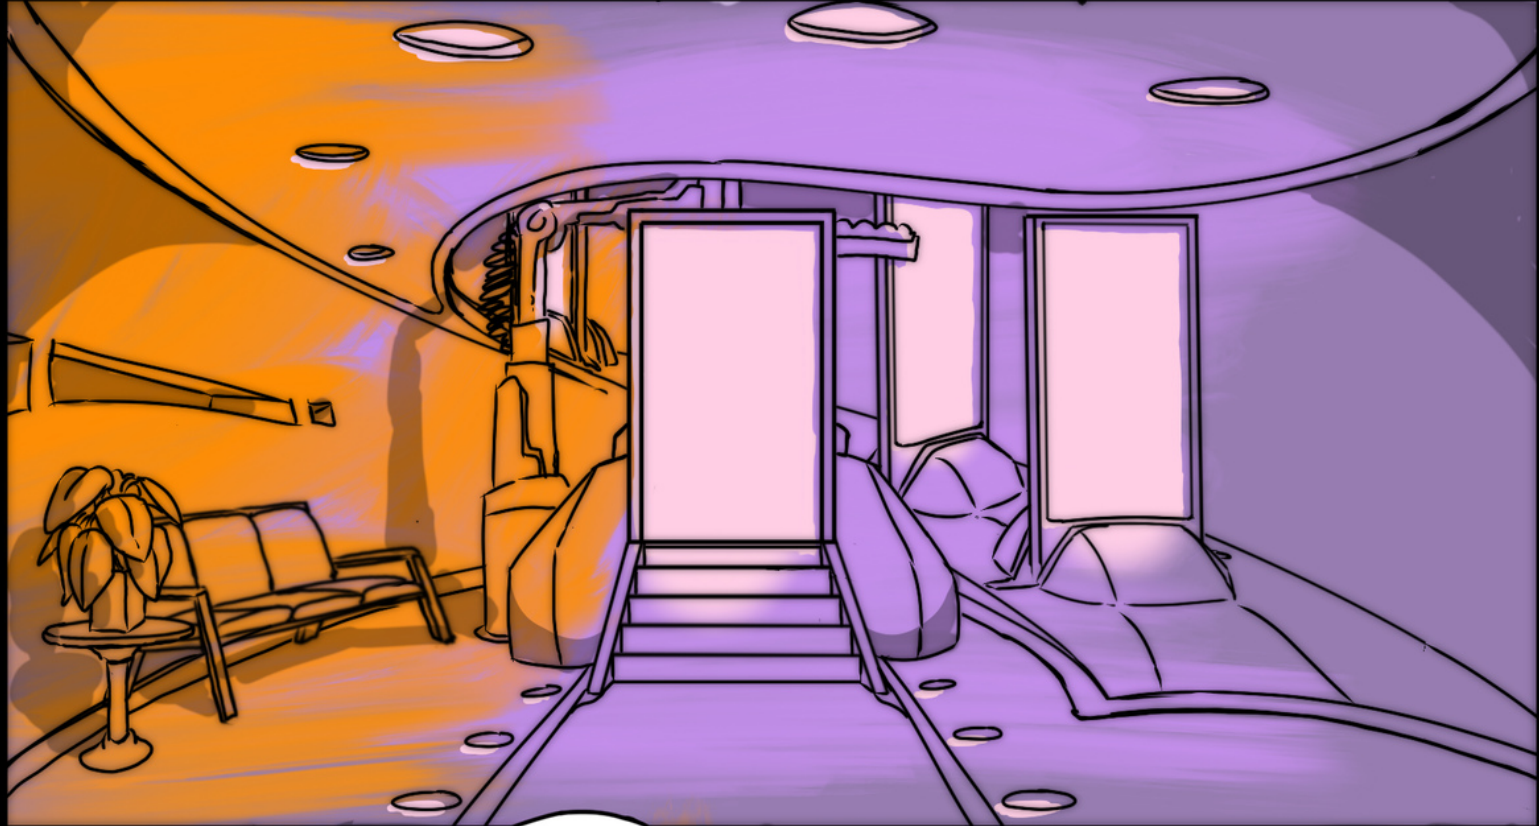

Oh fuck!

KA-CHOW!!!

Leave it alone!!

Come here!

End Part Two.
